eGov Projects			
Sr.	Ministry	Project Name	Description
		Completed	
1	The Judiciary	Setting up of IP PBX and LAN at New Court House/Rose-Hill District Court	The Judiciary intends to set up a Local Area Network and a new IP-PBX System at the New Court House.
2	Public Services Commission	Implementation of online application system	This project consists of enhancement of the current recruitment system, which will allow for the capture of data entered by applicants through the online application form directly into the Public Service Commission database.
3	Ministry of Finance and Economic Development / Treasury	Implementation of IP-PBX	The Treasury intends to replace its existing analogue PABX with an IP-PBX system.
4	Ministry of Foreign Affairs, Regional Integration and International Trade (MFARIIT)	e-Diplomacy Plan	The objective of the Digital Diplomacy Plan is to define an appropriate Information & Communication Technologies (ICT) Strategy to improve the work processes of the MFARIIT with emphasis on enhancing higher productivity and delivering a faster service
5	Ministry of Technology, Communication and Innovation	Oracle Survey	Renewal of Oracle licenses in Mins/Dept
6	Ministry of Technology, Communication and Innovation	e-Document Management System (eDMS)	eDMS being implemented on a pilot basis at MOFED and MTCI to manage effectively large volume of documents .
7	Ministry of Technology, Communication and Innovation	SkyGovNet	Procurement of networking equipment
8	Ministry of Public Infrastructure and Land Transport / National Transport Authority (NTA)	Electronic Queue Management System (EQMS)	This project consists of the impementation of an Electronic Queue Management System (EQMS) at NTA to improve the service delivery, quality, enhance customer satisfaction and provide an efficient means for handling all vehicles registration and licensing related services.

	eGov Projects		
Sr.	Ministry	Project Name	Description
9	Ministry of Public Infrastructure and Land Transport / National Transport Authority (NTA)	Privatisation of Vehicle Examination Centres (VECs)	This project consists of the implementation of a solution that will enable the exchange of vehicle details between NTA and the private vehicle examination centres. The platform will allow to streamline the business processes involved in the privatisation of the VECs.
10	Ministry of Public Infrastructure and Land Transport / National Transport Authority (NTA)	Information Plan for National Transport Authority	The purpose of this project is to prepare an Information Plan to enhance the operation and service delivery of the NTA.
11	Ministry of Education and Human Resources, Tertiary Education and Scientific Research	PCs for Computer Labs	Provision of PCs for Computer Labs for secondary schools
12	Ministry of Environment and Sustainable Development	Multi Hazard Early Warning and Emergency Alert System Consultancy (Phase 1)	Consultancy Services are being sought for an Emergency Alert System that will be implemented to warn the public of impending risks related to disasters (e.g. Cyclones, Tsunamis, etc) by sending alerts to citizen's mobile phones as well as TV and Radio broadcasts.
13	Ministry of Agro-Industry and Food Security	Plant Request System	This project consists of the implementation of a new Plant Request System that will allow the processing and management of Plant Requests from the public.
14	Ministry of Industry, Commerce and Consumer Protection	Computerisation of Price Fixing Unit	Deployment of an application software to facilitate the overall process of the price fixing unit.
15	Attorney General's Office, Ministry of Justice, Human Rights and Institutional Reforms	Implementation of Digital PABX on the 3rd Office	The 3rd floor at the Attorney General's Office is being refurbished and a new PABX system is being procured to provide telephony services to the users given that the existing Nortel PABX System could not be extendedas per the Supplier. The new PABX System would need to talk to the existing PABX System located on the ground floor using Tieline.

	eGov Projects		
Sr.	Ministry	Project Name	Description
16	Ministry of Business Enterprise and Cooperatives	Cooperatives Division e-Registration Project (CDeRP)	The project will comprise the preparation of an e-Business plan for the computerisation of the Cooperative Division
17	Ministry of Business Enterprise and Cooperatives	Revamp of LAN Cooperatives Division	Revamp of LAN to enhance the current network.
18	Ministry of Local Government and Outer Islands	Revamping of Building and Land Use Permit (BLP) application	This project involves the review and revamping of the Online BLP application and the back-end processing of the BLP application.
19	Ministry of Finance and Economic Development / Assessment Review Committee	Digital Recording System at ARC (Pope Hennessy Building, Port Louis)	The project consists of a Digital Recording System to be set up in the new premises of the ARC for the recording of all ARC sittings
	Ongoing		
1	Electoral Commissioner's Office (ECO)	ECO application	Upgrade of ECO application (including Voters' Register, polling stations, election statistics) using J2EE technology
2	Ministry of Defence and Rodrigues / Rodrigues Regional Assembly	Revamping the Digital Court Recording System Rodrigues Regional Assembly	The Rodrigues Regional Assembly intends to revamp the DRS for the Regional Assembly and to set up a new DRS including one in the Committee Room. Reporters/Audio Typists transcribe the parliamentary debates into word documents for record purposes.
3	The Judiciary	Revamping the Digital Court Recording System	The Judiciary intends to revamp the existing Digital Court Recording System (DCRS) in order to meet new challenges and for speedier delivery of justice. The new recording of court proceedings will make use of the latest state-of-the-art technology.
4	The Judiciary	Computerisation of Revenue Management System and backend	The Judiciary intends to introduce a modern Computerised Revenue Collection System for proper control and monitoring of collection of revenue, thereby generating all outstanding arrears to be included in the half yearly return of arrears of revenue.
5	Prime Minister's Office/Civil Status Division	Acquisition of IT Equipment	Acquisition of IT Equipment to access the CSD and MNIS system

	eGov Projects		
Sr.	Ministry	Project Name	Description
6	Prime Minister's Office (PMO)	Implementation of the e-Business Project for Prime Minister's Office	The e-Business project will review, modernize and improve the business and work processes of Home Affairs through an automated system to improve productivity, quality and service delivery. The project will be implemented in three phases.
7	Prime Minister's Office / Traffic Branch	Road Eye Project (Traffic Branch)	The Road Eye Project (REP) is to bring innovation using technology as a tool by capturing live video recordings of driving tests carried out by the Traffic Branch.
8	Prime Minister's Office / Traffic Branch	Scanning and data capture exercise	Facilitate access and management of large quantity of manual driving licence records/documents
9	Ministry of Defence and Rodrigues / Mauritius Prison Service	Prison Management System (Phase II)	Phase II consists of an enhancement to include Prison Production System, Sentence Planning System, Baby Management System,etc.
10	Ministry of Defence and Rodrigues / Mauritius Prison Service	Revamping of PABX System at Grand Riviere Prison	The new PABX system will cater for 20 digital extensions
11	Ministry of Defence and Rodrigues / Mauritius Prison Service	Revamping of PABX System at Beau Bassin Head Quarters	The new PABX system will cater for 250 extensions (both analogue and digital extensions)
12	Prime Minister's Office / Department of Civil Aviation	Standard Software System for Aviation Regulators	The new application software will cater for the computerisation of the whole activities carried out by the Regulatory Section of the Department
13	Ministry of Defence and Rodrigues / Mauritius Prison Service	e-Rehabilitation System	The system will cater for the computerisation of the whole activities of the Rehabilitation Youth Centre for Boys and Girls
14	Prime Minister's Office/ Government Printing	Management Information System	Computerisation of Government Printing Office.

Sr.	Ministry	Project Name	Description
15	Ministry of Finance and Economic Development	LAN Revamp	MOFED intends to revamp the existing LAN infrastructure at the MOFED premises in the Government House. The revamp is being carried out to replace the existing and old LAN infrastructure and enable development of additional network capabilities in the future.
16	Ministry of Finance and Economic Development / Treasury	Implementation of Accrual Based Accounting	The Treasury intends to implement a change in the Treasury Accounting System, whereby a new secondary ledger using accrual-based accounting is being introduced. The change is being implemented to comply with IMF rules
17	Ministry of Finance and Economic Development / Treasury	Motor Vehicle Accident Claims System (MOVACS)	The Treasury intends to computerize its Motor Vehicle Accident Claims Section. The intended objective is to decrease paperwork, reduce human/clerical errors, enhance efficiency and accelerate processing.
18	Ministry of Finance and Economic Development/ Statistics Mauritius (SM)	Revamping of Core System at Statistics Mauritius	The project consists of the revamping of the existing core system at Statistics Mauritius with the development and implementation of a register-based population database.
19	Ministry of Defence and Rodrigues / Mauritius Police Force	Tablets and Mobile App for Police Officers	The Mauritius Police Force (MPF) is looking to provide its officers with mobile devices, which will enable them to readily access important information whilst they are on patrol. The Mobile devices will need to be supplied with an appropriate mobile app, which will give access to various functionalities.
20	Ministry of Defence and Rodrigues / Mauritius Police Force	Automated Fingerprint Identification System	The Mauritius Police Force (MPF) is envisaging to replace its existing Automatic Fingerprint Identification System (AFIS). The new system will have latest features and will implement new functionalities namely Fingerprint Live Scanning and Palm Print Identification at Police Stations and Police Branches in order to improve efficiency and effectiveness in the police services.

	eGov Projects		
Sr.	Ministry	Project Name	Description
21	Prime Minister's Office / Department of Civil Aviation (DCA)	Computerisation of the Permit Office of the DCA	Automation of the operations of the Permit Office for the issuance of Aviation Security Identification Card (ASIC) passes.
22	Ministry of Housing and Lands	LAVIMS - Hardware Replacement	The LAVIMS system is operational since 2010. The hardware procured in 2009 now require replacement, particularly as these equipment are no longer supported by Original Equipment Manufacturers (OME).
23	Ministry of Housing and Lands	State Land Register	Computerising the lease management system at the Ministry of Housing and Lands which will automate the whole process of lease application through update in Revenue system till integration on the existing LAVIMS system.
24	Ministry of Foreign Affairs, Regional Integration and International Trade (MFARIIT)	VoIP Solution, WiFi and LAN	The Ministry of Foreign Affairs, Regional Integration and International Trade (MFARIIT) is proposing to deploy a new VoIP Telephony solution (including new LAN and integrated WiFi Solution) at its offices and departments.
25	Ministry of Technology, Communication and Innovation	High Speed Connectivity in Primary Schools	The project consists of the deployment of:(i) High-speed connectivity using wide area network optimisation technologies at 276 sites in Mauritius and Rodrigues comprising of primary schools and the Government Online Centre (GOC);(ii) Wireless connectivity (Wi-Fi Hotspots) in 275 primary schools for grades 1 and 2;(iii) High performance infrastructure at the GOC comprising of core networking equipment
26	Ministry of Technology, Communication and Innovation	Development of Mobile applications	The Smart apps platform will integrate a host of mobile applications along with a government App Store website. The project will consist of: - 1. Developing a Service Oriented Architecture system 2. Implementing a government App Store website 3. Developing a number of mobile apps

		eGov Projects	
Sr.	Ministry	Project Name	Description
27	Ministry of Technology, Communication and Innovation	Development of an Open Data Portal	An Open Data Portal will allow for publishing of datasets by Ministries and Departments for the benefit of the Public in line with the Open Data Policy to be formulated by the MTCI.
28	Ministry of Technology, Communication and Innovation	Fleet Management System	Implementation of a fleet management system to manage and monitor the Ministry's fleet of vehicles for Min. of Arts and Culture and Ministry of Foreign Affairs, Regional Integration and International Trade
29	Ministry of Technology, Communication and Innovation / Data Protection Office (DPO)	Forensic Project	Implementation of a Forensic solution which will allow the DPO to carry out in-depth analysis of the contents from the captured image.
30	Ministry of Technology, Communication and Innovation	SchoolNet II (including rental and wifi)	High Speed secure internet links of 10 MBps and Wireless Connectivity in schools (163 State and grant aided Secondary Schools) will be implemented)
31	Ministry of Technology, Communication and Innovation	Deployment of Data Connectivity (SkyGovNet)	SkyGovNet Deployment of Data Connectivity consist of the upgrade of data connectivity (bandwidth and associated services) within the GINS and the Internet Connectivity at GOC.
32	Ministry of Technology, Communication and Innovation	National Authentication Framework (NAF)	NAF provides a SINGLE window for authentication of user and also provide a convenient and secured access to all e-Government services. NAF is a comprehensive framework to deliver e-services to the intended user in a secured manner.
33	Ministry of Technology, Communication and Innovation	Digital Government Strategy	Recognising the positive impact of e-Government on the development of Mauritius, the Ministry is embarking on the formulation of a Digital Government Strategy 2018-2022
34	Ministry of Technology, Communication and Innovation	Mauricloud	Mauricloud will be created to offer a platform for issuance and verification of documents & certificates in a digital way.

		eGov Projects	
Sr.	Ministry	Project Name	Description
35	Ministry of Technology, Communication and Innovation	Framework Agreement for IT Equipment	Procurement of Personal Computers, Laptops and A4 Laser Printers for Ministries and Dept under Framework Agreement to achieve economy, efficiency and effectiveness.
36	Ministry of Public Infrastructure and Land Transport - Traffic Management Road Safety Unit (TMRSU)	Road Crash Data Management System (RCDMS)	This project consists of computerisation of Road Crash Data, Analytics for identification of accident prone areas and road blackspots. The RCDMS project has been initiated to achieve a 50% reduction in the number of killed and serious injury crashes by the year 2025.
37	Ministry of Public Infrastructure and Land Transport / National Transport Authority	Automated Data Exchange with Insurance Companies	This project consists of the implementation of a solution that will enable the automatic exchange of vehicle insurance details between the National Transport Authority (NTA) and the Insurance companies in order to provide a common and secure platform that will allow to streamline the business processes involved in the Insurance certificate.
38	Ministry of Education and Human Resources, Tertiary Education and Scientific Research	Acquisition of Equipment for Early Digital Learning Programme	
39	Ministry of Education and Human Resources, Tertiary Education and Scientific Research	Procurement of PCs	Procurement of 1350 Personal Computers for primary and secondary schools
40	Ministry of Education and Human Resources, Tertiary Education and Scientific Research (MOEHR)	Procurement of projectors and notebooks	Procurement of 124 projectors and notebooks for science labs
41	Ministry of Education and Human Resources, Tertiary Education and Scientific Research (MOEHR)	e-Timetabling Software	e-Timetabling Software for secondary schools to help school management to easily prepare timetables

		eGov Projects	
Sr.	Ministry	Project Name	Description
42	Ministry of Health and Quality of Life (MOHQL)	Implementation of e-Health plan	The project aims at improving the work processes of all the Health Centres of the Ministry of Health and Quality of Life through the use of ICT. Pilot Site: Dr. A.G.Jeetoo Hospital (Medical Records, Clinical Module (Nursing Care and Doctor),Pharmacy Modules)
43	Ministry of Health and Quality of Life (MOHQL)	Laboratory Information Management System (LIMS)	To increase the speed and accuracy of diagnosis services to enable more efficient service delivery and quality patient experience, the MOHQL is embarking on computerization of the laboratory operations in Central Health Laboratory (CHL) and 5 regional hospitals (including Rodrigues) and one (1) peripheral laboratory situated at Souillac.
44	Ministry of Agro-Industry and Food Security	eAgriculture project	Implementation of the eAgriculture Action Plan to enhance the operations and service delivery of the Ministry Agro-Industry and Food Security and parastatal organisations involved in the agriculture sector.
45	Ministry of Agro-Industry and Food Security	Application for Lease agreements	This project consists of the implementation of an application to manage the lease agreements signed by the Ministry and planters, Cooperatives or companies for the occupation of agricultural land.
46	Ministry of Agro-Industry and Food Security	Library Software	This project consists of the implementation of a library software to manage library items, generate management reports and allow better tracking of items.
47	Ministry of Agro-Industry and Food Security	Migration of Land Conversion Permit System to Government Online Centre (GOC)	The existing Land Conversion Permit System implemented in Oracle 6i and 8i will be migrated to Oracle 11g and moved to GOC environment.

eGov Projects			
Sr.	Ministry	Project Name	Description
48	Ministry of Agro-Industry and Food Security	Computerisation of Engineering Department (Workshop Section)	Computerisation of the Workshop section, to include Vehicle Maintenance System, Asset Management System and Inventory Management System.
49	Ministry of Industry, Commerce and Consumer Protection	MAURITAS Accreditation Management System	To reduce paper use/printing toner, streamline/computerize current workflows and make the accreditation processes more rapid/efficient
50	Ministry of Business Enterprise and Cooperatives	Setup of Micro, Small and Medium Enterprises (MSME) Portal	The MSME portal would be designed as a knowledge portal which provides Value Added Information to MSMEs and acts as a valuable resource to the desired target user groups.
51	Minister of Social Integration and Economic Empowerment (MSIEE)	Enhancement of Social Integration Management Information System (SIMIS) to include Social Register of Mauritius – Child Allowance (SRM-CA)	Enhancement of SIMIS to include SRM-CA. The SRM-CA is payable to eligible families, assessed through the Proxy Means Test (PMT) in favour of a maximum of three (3) school-going children, aged between 3 and 23, who satisfy a school attendance criterion of 90 % for two consecutive months for normal children and 75 % for disabled children.
52	Ministry of Gender Equality,Child Development and Family Welfare	Integrated Support Services Against Domestic Violence	The project consists of the implementation of a comprehensive integrated system with the aim to provide immediate, consistent, coordinated, timely support and counselling to domestic violence victims
53	Ministry of Ocean Economy, Marine Resources, Fisheries and Shipping - Shipping Division	Computerisation of Shipping Division	Computerisation of the shipping activities such as registration of ships, certificates for ships and seafarers, movement of vessels etc
54	Ministry of Local Government and Outer Islands	Ebizframe International Public Sector Accounting Standards (IPSAS) Enhancement	Implementation of the IPSAS enhancements to start from 01 July 2017 with current Ebiz Application Software.
55	Ministry of Local Government and Outer Islands	Public Utilities Online Approval System for Building & Land Use Permits (BLP)	This project consists of the implementation of online approval system for Utilities (CWA, CEB, WMA) to integrate with BLP system for BLP application processing.

		eGov Projects		
Sr.	Ministry	Project Name	Description
56	Ministry of Civil Service and Administrative Reforms	Integrated Human Resource Management Information System (HRMIS) - Phase 1	HRMIS will harness ICT capabilities to enhance administrative efficiency and timeliness, and ensure quality service to management and employees.
57	Ministry of Civil Service and Administrative Reforms	Electronic Attendance System	The Electronic Attendance System will be accessed from within the Oracle Human Resources Management Information System (HRMIS) to enabling users to clock in and clock out.
58	Prime Minister's Office	Safe City	The project aims at enhancing the security and safety of the public to enable the Police Department to obtain better intelligence with a view to optimising response.
		On Hold	
1	Ministry of Financial Services,Good Governance and Institutional Reforms	e-Business Plan for MFSGGIR	This project consists of examining the activities of the Ministry of Financial Services, Good Governance and Institutional Reforms (MFSGGIR) and preparing an e-Business Plan for harnessing Information and Communication Technologies (ICT) to enhance the operations and service delivery of the MFSGGIR.
2	Prime Minister's Office / National Development Unit	Project Management Information System (PMS)	The PMS solution covers all phases of a project as well as the management of all the documents related to a project. PMS coordinates projects through logical and chronological segmentation. With PMS, a complete project portfolio and project management solution will connect the various departments within your organization and facilitate communication.
3	Ministry of Public Infrastructure and Land Transport / National Transport Authority (NTA)	Integrated Service Delivery System for NTA	In order to enhance its operation and service delivery, the National Transport Authority (NTA) wishes to implement an integrated Service Delivery System across its offices in Mauritius and Rodrigues including interfaces with external stakeholders.

	eGov Projects		
Sr.	Ministry	Project Name	Description
4	Ministry of Agro-Industry and Food Security	Fleet Management System	Implementation of a Fleet Management System for its Transport Section consisting of 100 vehicles with Vehicle tracking functionality.
5	Ministry of Technology, Communication and Innovation	Smart Bus Information System	Implementation of a Smart Transport System and Mobile App Project to provide a reliable and modern public bus transport service
6	Ministry of Public Infrastructure and Land Transport	Mauritius Smart Parking System	This project consists of the implementation of a Smart Parking Management System that will enable the general public to make maximum use of available parking spaces in major cities and villages across the island by monitoring how the parking space is being used.
7	Ministry of Environment and Sustainable Development	Air Quality Monitoring System	A real-time Air Monitoring System based on IoT technology will try to enhance the deterioration of the quality of the air by being more flexible and timely.
8	Ministry of Defence and Rodrigues / Mauritius Police Force	Secured IT Infrastructure for NSS	Project is about the setting up of a secured IT infrastructure for exchanging information for MPF's National Security Service department (NSS) and its related sub-offices located throughout the island. The project consists of the installation, configuration and commissioning of required data cabling, servers & services.
